

Recreation Centers

Indoor Practice Fields

Gymnasiums

Natatoriums

"Element® by Big Ass Fans® is completely quiet – there's no comparison with smaller fans. The fan provided the air circulation needed to complement all programs held in our rec center, whether those are classes, clubs, camps or open recreation."

Eric Stein,
Associate Director of Athletics
for Physical Education,
Recreation and Wellness
Stanford University

"Before Powerfoil® X Plus™ fans were installed, we couldn't use our practice facility on some days because it was so hot – the players preferred to be outside. It now feels 10-15 degrees cooler and we use the building every day."

John Dugas,
Assistant Athletic Director
University of Louisiana-Lafayette

"Powerfoil® X™ by Big Ass Fans® allows us to use less air conditioning by moving the air around and making us feel more comfortable. With the Virtual Guard, students have not damaged the fans playing kickball in the gym."

Thomas DeBolt,
Superintendent
Manassas Park School District

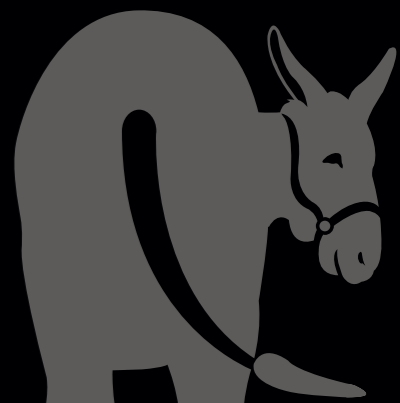

"In our natatorium we had areas of the pool that had "hot spots" where there was very little airflow. Our two Powerfoil® X Plus™ fans helped put the air in motion and eliminate drafty conditions."

Jim Heffel,
Aquatics and Safety Coordinator
George Mason University

FANS FOR COMMON AREAS

What's more important – saving money or student comfort?

Now you don't have to choose. You can have both. Large buildings, high enrollment levels, budget cuts, and rising utility costs are driving higher education and K-12 sectors to evaluate their energy-management practices.

Big Ass Fans® silently and effectively addresses energy challenges year round with our innovative line of 8 to 24-ft. air movement products. Providing an efficient way to improve indoor air quality, increase ventilation effectiveness and enhance thermal comfort are Big Ass Fans' top priorities.

Big Ass Fans has education market specialists standing by to address your biggest challenges – reducing energy costs and improving student comfort. Call us today and find out how we can save you money and improve the conditions of your school!

Cafeterias

"Our cafeteria is an open space with high ceilings and was uncomfortable for our students. Smaller fans were not effective, but Element® by Big Ass Fans® is one of the best investments we've made. Adding more air conditioning was cost-prohibitive, and Element proved to be a cost-effective solution."

Bernard Ho,
Principal
Damien Memorial School

Student Life

"We needed a cost-effective solution to student comfort in the two-story, open lobby at the Tonopah Residence Complex. Looking at several solutions, we were pleased to discover Isis® by Big Ass Fans®. Isis was easier and more cost-efficient to install than running more pipes!"

Jim Stinar,
HVAC Specialist
University of Nevada Las Vegas

Libraries

"Element® keeps the warm air down and reduces the cycling time of our HVAC system. I'd recommend Element for any area of a school where climate control, student comfort and energy savings are concerns."

Tom Lytle,
Principal
Machetanz Elementary

LEED credits really add up!

- Increased Ventilation Effectiveness IEQ Credit 2
- + Enhanced Refrigerant Management IEQ Credit 4
- + Minimum Indoor Air Quality Performance IEQ Prereq 1
- + Innovation in Design IEQ Credit 1
- + Optimize Energy Performance IEQ Credit 1
- + Thermal Comfort – Design IEQ Credit 7.1

Adding a Big Ass Fan to your facility is a no-brainer!

Ask how Big Ass Fans contributes to LEED® credits in: Optimized Energy Performance; Enhanced Refrigerant Management; Minimum Indoor Air Quality Performance; Increased Ventilation; Thermal Comfort – Design; Innovation in Design.
