Energy Savings Kit for Existing Dock Levelers

Get rid of the Energy-Eater hiding under your leveler. Each year thousands of dollars are lost at your loading docks from levelers that are not insulated. Whether you are dealing with cold storage, warehousing, or trying to keep your loading docks warm during the winter months, DL Manufacturing has developed a solution, a green solution... *the Leveler Koozi™.*

Easy to Install—

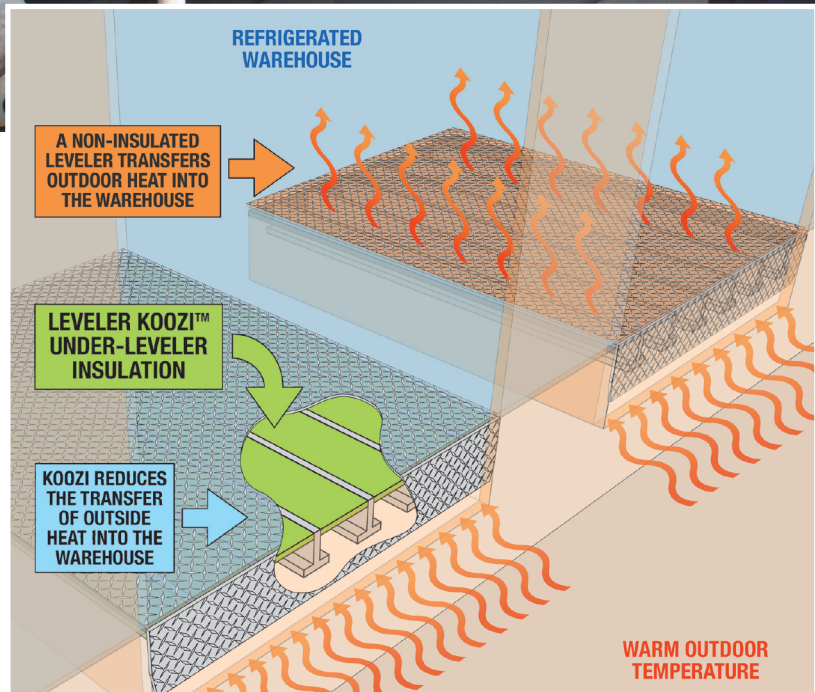

The Koozi is suitable for most existing levelers and is installed between the structural beams on the under side of the dock leveler platform.

The Koozi is pre-cut in 2' widths/4' lengths with perforations at 1" width intervals, for easy installation.

The Koozi uses magnetic fasteners that allow Koozi to be installed on any deck regardless of condition – rust, flaking paint, uneven surfaces, etc., for installation flexibility.

Quick Return on Investment—

Depending on climate, the Leveler Koozi™ will pay for itself in *less than one year.*

Green

INNOVATIVE PRODUCTS FOR THE LOADING DOCK INDUSTRY

Going Green Has Never Been So Easy...and Cost Effective!

Some decisions to Go Green can be difficult and expensive to implement – the Leveler Koozi™ is an easy and cost effective solution for your energy loss at existing dock leveler decks. Leveler Koozi™ greatly reduces heat transfer from the dock leveler – saving energy.

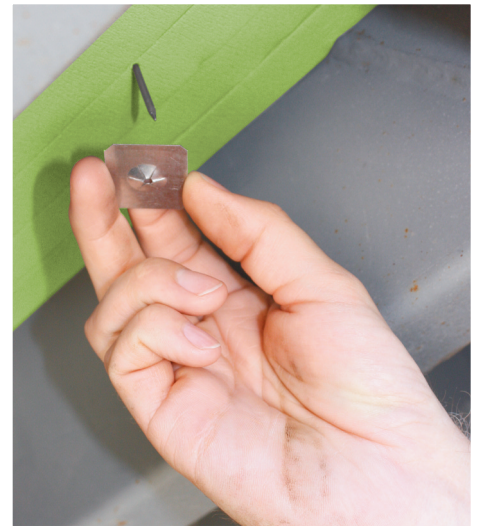

Be sure to check out our website for other GREEN products by DL Manufacturing.
