QxV™
Flexible Sectional Dock Door
PATENT NUMBER 9,500,024

Quality and Value in a Sectional Dock Door

Durability and soaring energy costs continue to be a challenge in the loading dock industry. DL Manufacturing has come up with an affordable solution that eliminates air and light gaps in the QxV Flexible Sectional Dock Door. The key to our design is a rugged, flexible PVC panel with an R-value of R-22 which is why QxV surpasses the performance of other sectional dock doors. This makes QxV an ideal solution for cold storage applications and behind vertical storing dock levelers.

QxV™ Features –

- **High Performance –** QxV's flexible PVC panel resists damage from impact better than standard steel panels

- **Flexible Energy Saving Panels –** QxV uses closed cell foam PVC panels with R-22

- **Side Compression Seals –** prevent air leakage at sides which makes QxV ideal for cold storage applications

- **Available in vertical lift, high lift and standard lift installation**

DL Manufacturing

INNOVATIVE PRODUCTS FOR THE LOADING DOCK INDUSTRY

SPECIFICATIONS

QxV Dock Door

Panels:	3"thick, UV Inhibited, Weather Resistant PVC
Insulation:	Expanded Polystyrene Foam R-22
Door sizes:	Up to 12' x 14'
Panel Seals:	Triple Compression Seals
Side Seals:	Compression Seal
Bottom Seals:	Rubber with optional rubber/brush combination
End Cap:	Galvanized Metal with Zinc Plated Hinges
Rollers:	3" 10-Ball Zinc Plated Rollers
Track:	3" metal roller track
Optional Lock:	Offers intruder security
	Optional Cooler Door Package

Torsion Springs

Spring Cycle:	15 K (standard)
Cables:	5/32" - 7 x 19 galvanized steel
Shaft:	1" keyed hollow shaft
Bearings:	1" UCF Precision Flange Bearing

OPTIONS

Vision Panel –
is insulated and offers the added safety of visible verification of truck activity.
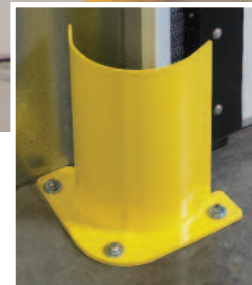

Track Guard –
protects the base of the track in an area prone to collision damage.
