

# Clover Tool Manufacturing Concord, ON

## FEATURED PRODUCT

2 Durashield (DS) Enershield Air Barriers

## PROJECT OVERVIEW

Cold drafts would often enter Clover Tool Manufacturing's facility during the winter causing employee discomfort, hindering their productivity. Employees at Clover Tool Manufacturing were eager to have air barriers installed; however, due to limited headroom at their facility, workers at Clover Tool Manufacturing was unsure whether this would be possible.

Once an Account Manager from Northern Dock Systems arrived on-site to conduct a Needs Assessment, workers were ensured that installing Enershield Air Barriers was still possible, despite the limited headroom.

Moreover, the Manager was informed about the numerous benefits the Air Barrier Direct Install Program had to offer, including:

- An estimated **return on investment** in 1.2 months.
- An estimated **savings of up to \$5,329.92/year** on their natural gas bills.
- Maintaining a comfortable temperature for employees around the loading dock area, enhancing workplace productivity and efficiency.

**Annual energy savings**   **Productivity**   **Indoor comfort**

**Temperature control**

**TOTAL ENERGY SAVINGS**

Estimated annual savings on natural gas bills   **\$5,329.92**

**RETURN ON AIR BARRIER INVESTMENT**

A quick ROI through the Direct Install Program   **1.2 months**

**DID YOU KNOW...**

Enershield Air Barriers can be installed vertically for loading dock areas with limited space (low headroom).
