Project Overview

The existing dock seals were old and worn out at Creemore Springs. It had a poor contract grade quality with no wear pleats and seals were failing and allowing the elements in the building. Also, the old and worn seals didn't look very tidy on the wall.

They contacted us to create a better seal on the building by replacing the aged dock seals. The new seals create an airtight seal around trailers to keep out unwanted elements such as drafts, dirt, rain, snow, insects, pests and white light.

These dock seals look better on the building and will continue to provide energy savings to Creemore Springs as the tight seal will prevent heating and cooling loss for years to come.

- ✓ Tight seal
- ✓ Workplace productivity
- ✓ Improve safety
- ✓ Indoor comfort
- ✓ Energy-savings

Featured Products

Dock Seal

Durable and abrasion resistant fabric creates a tight seal to block harsh weather and pests. Custom built to ensure perfect seal and save on energy costs.
