

# Crown Property Management

Toronto, ON

Before

After

## Project Overview

This busy downtown Toronto shipping and receiving location was looking for a door that would add security, provide energy savings while keeping up with their fast-paced environment. However, the low headroom and limited space to add a door were proving to be a problem.

The [Heavy Duty High Cycle \(HDC\) springless low headroom rubber door](#) was the perfect solution since:

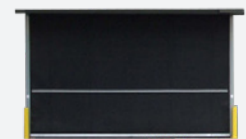

- This low headroom model can fit in even the tightest of spaces.
- With opening and closing speeds up to 16" per second, the door can keep up the fast-paced environment.
- The fast opening and closing speeds also provide energy savings by preventing energy loss.
- This durable door can also withstand impacts. After impact, the door is up and running in minutes, with no special tools or materials needed.
- Finally, there is less downtime and maintenance required because this springless rubber has no hinges, cables, pulleys or tension springs.

By adding a springless rubber door, Crown Property Management is able to secure its premises while getting energy-saving benefits. All the while, saving money on future maintenance costs.

- ✓ Operational efficiency
- ✓ Workplace productivity
- ✓ High-speed
- ✓ High cycle
- ✓ Heavy-duty
- ✓ Low headroom
- ✓ Energy-savings

## Featured Products

[Heavy Duty High Cycle \(HDC\) Springless Low Headroom Rubber Door](#)

Impactable heavy duty rubber doors can be easily reset in minutes; reducing your facility's downtime in the event of an accidental impact.

Operators have a 5 year or 1,000,000 cycle warranty on it.
