

Double Entrance Swing Doors with Keypad Lockset
National Tank Services

Mississauga, ON

Project Overview

The entrance swing doors to the secondary electrical room had their spines broken and the frame was coming loose at National Tank Services in Mississauga.

Our swing door technician removed the existing frame and entrance door. Next, he installed a new knockdown frame and double doors with tack welded seams for greater strength. Complete with new hinges, top and bottom slide bolts for the inactive door, an astragal and an exterior Unican mechanical keypad lockset for added security.

- ✓ Security
- ✓ Durability
- ✓ Heavy duty
