

Head Curtain Dock Seals Levitt Safety

Oakville, ON

Project Overview

The old dock seals at Levitt Safety in Oakville had been worn down after years of heavy use. As a result, the ripped dock seals were not performing as they should and could not seal out inclement weather, dirt and insects.

We removed all six of their old dock seals and replaced them with new [Blue Giant Adjustable Head Curtain Dock Seal \(200\)](#). Furthermore, we worked with their local utility company to get them a one-time energy rebate which covered 100% of the costs for the new dock seals.

These head curtain dock seals feature the following:

- 22 oz high tear vinyl.
- 22 oz 4" wear pleats for three layers of fabric protection across the front of the dock seal.
- 24" guide strips to make it easy for backing up trucks to align with the dock seal.
- 99% memory foam to cushion between the trailer and the building.
- Full-width weighted head curtain conforms to the trailer top.
- Sloped head curtain supports proper drainage to prevent water build-up.
- The velcro split head curtain allows the center section of the curtain to be adjusted even after the truck has docked.

Due to having new dock seals that properly seal out inclement weather, dirt and insects at no cost to them because of the energy rebate, they were delighted with the outcome. In addition, they were happy with how professional Northern Dock Systems was from the start to the end of the project.

- ✓ Tight seal
- ✓ Indoor comfort
- ✓ No white light
- ✓ Energy-savings
- ✓ Pass audits

Featured Products

[Head Curtain
Dock Seal \(BG200\)](#)
